Course Description

Through sensitive perception and engagement with materials, this course will expand one's ability to see relationally. Participants are invited to use a range of collage and water-based materials such as ink, watercolor and acrylic to translate what they perceive (including, but not limited to, what one perceives through sight) into a visual system of organization, creating works that will range in duration and scale.

Emphasis will be placed on fierce looking, light and value, mark-making and touch, scale and materiality, atmosphere and air, tone and energy. This series will also focus on the cultivation of each participant's respective motivations, methods and subsequent meanings in painting. All levels of experience are welcome.

Course Outline

Class meetings will present visual situations and themes, typically including a live model, and the majority of class time will be spent making paintings from observation or through a suggested alternative strategy. Formal aspects of drawing and painting will be emphasized so as to better integrate these elements within the overall content and emotional tenor of the work. Works on paper will vary in size, media, strategy, duration and focus.

Learning Outcomes

This course is designed to heighten attention and sensitivity to one's actions during the act of painting on paper and to heighten attention and sensitivity to the viewing of works. Participants will learn to translate three-dimensional space into two-dimensional marks; to respond energetically as well as analytically to observed space and form; to cultivate studio habits that will lead to self-sufficiency; and to begin to recognize strategies for art-making which bring them joy and elicit a response of 'yes'.

Assessable Tasks

Paintings on paper will be developed during each class session; participants should expect to complete a combination of long works and/or multiple short works during each session. It is suggested that all students keep a sketchbook in which they build, independently, upon the class strategies which they find to be the most useful to their own practice.

Evaluation and Grading

For MFA students, grading is on a High Pass/Pass/Low Performance/Fail basis. To achieve a Pass grade, students should demonstrate engagement with their work, strong participation and attendance, and a striving to find a balance between effort and ease in making. A grade of High Pass will be reserved for students who demonstrate the above to an exceptional degree. Please refer to the Student Handbook for the attendance policy; three unexcused absences will result in a lower grade and possibly failure.
